

PI 01-02
Pin Insert

Product Description

The PI 01-02 is designed to insert a metal pin into a catheter tube

The operator positions the tube into the bushing in front of the device and activates the device using a pushbutton or foot pedal.

Pins are positioned in the magazine and are pushed into the tube with a pneumatic cylinder. The pin can be sealed inside the tube in the following tip forming process.

Production capacity:

The production capacity is between 800-1.200 units per hour. Depending on the FH size of the tube and the experience of the operator.

Tube specifications:

Tube Diameter:	Fr 6-36 (one toolset is used for each Fr size and eye pattern).
Tube Material:	Most thermoplastics.
Tube Length:	Infinite.

Installation:

Compressed Air:	8 bars of cleaned and dried air.
-----------------	----------------------------------

Environment:

It is recommended to operate the machine in a clean environment.
